CHAPTER

1 Study and Methodology

Objectives of the Study

The main objective of the study was to use an appropriate tool designed by ICAD to conduct a study on the level of representation in parliament through member participation on the proceedings of parliament in the years 2008 and 2009. Produce a score card report of the level of participation of the individual Members of Parliament as per the selected indicators derived from the procedures, rules and conduct of the house business.

Study Design

This study adopted a content analysis methodology or design. Content analysis is a method for summarizing any form of content by counting various aspects of the content (www.audiencedialogue.net). The content that is analysed can be in any form such as printed publications, broadcast programs, other recordings, the internet, or live situations, but is often converted into written words before it is analysed. This method was considered the most appropriate for this study because the main sources of data to be analysed was the Hansards for 2008 and 2009.

Population and Sampling

The same sampling principles applicable in surveys are applied in content analysis where a sample must be representative of the population. In this case it required sampling in two levels: first for determining the number of MPs to include in the study and second to determine the number of Hansards to subject to content analysis. In regard to the number of Hansards to use, the study decide to use all the han-

sards in the two years, it was argued that sampling the hansards might lead to biases in the event that most of an MP's contributions were contained in the hansards that were sampled out. Regarding the number of MPs, the study decided that all MPs who participated in the two years under study be included i.e. for 2008, all the 223 members of parliament were included (210-elected, 12-nominated and 1-ex officio) and the two deceased (Kipkalia Kones and Lorna Leboso) giving a total of 225. The same applied to the years 2009 where all the 223 MPs were included. However the speaker participation was not tallied due to the nature of his role as the presiding officer.

Data collection Technique

The data collection technique used was mainly quantitative i.e. units of predefined contents were identified, tallied and the aggregated tallies entered into a predestined study instrument (form).

Study Instruments

Two main study instruments were used consecutively:

- Score Sheet (Tallying Sheet): a score sheet whose design was based on the main score card form was used for tallying content counts from the hansards. The tallying was done for each individual Member of Parliament on all the indicators.
- Score Card Tool (Form): The score card tool developed by ICAD was used to record aggregated of the tallied contents from the tallying sheet.

Data Analysis

Data capture in the forms were entered into a computer through data entry screen prepared in SPSS (computer program), which was subsequently used to conduct the analysis (produce summary table). The summary tables were then interpreted and discussed appropriately into report.

CHAPTER

2 Introduction

Introduction

This chapter presents the findings from the analysis of data extracted from the Hansards used in the study. After the analysis, the findings were presented in tables and charts as well as narrative forms.

Number of Members of Parliament in the 10th Parliament

The first session of the 10th parliament started on 15th January 2008, on that day the speaker was elected and the MPs were sworn in soon after. The house was then adjourned sine die. The second session of the 10th parliament was opened on 6th March 2008 with a speech from the Speaker and the President then the house adjourned again until 11th March 2008. House business effectively started on 11th March 2008 with a total of 217 members of parliament and that day's Hansard report was considered the first in the study. By-elections in the remaining eight constituencies were concluded and the number of MPs increase to 223. However, the contributions of the Deceased MPs (Kones and Laboso) were considered for the period that they served. This therefore there was a total 225 MPs in 2008. The third session of the 10th parliament started on 20th January 2009 with a total of 223 MPs and the number remained the same for the rest of the year.

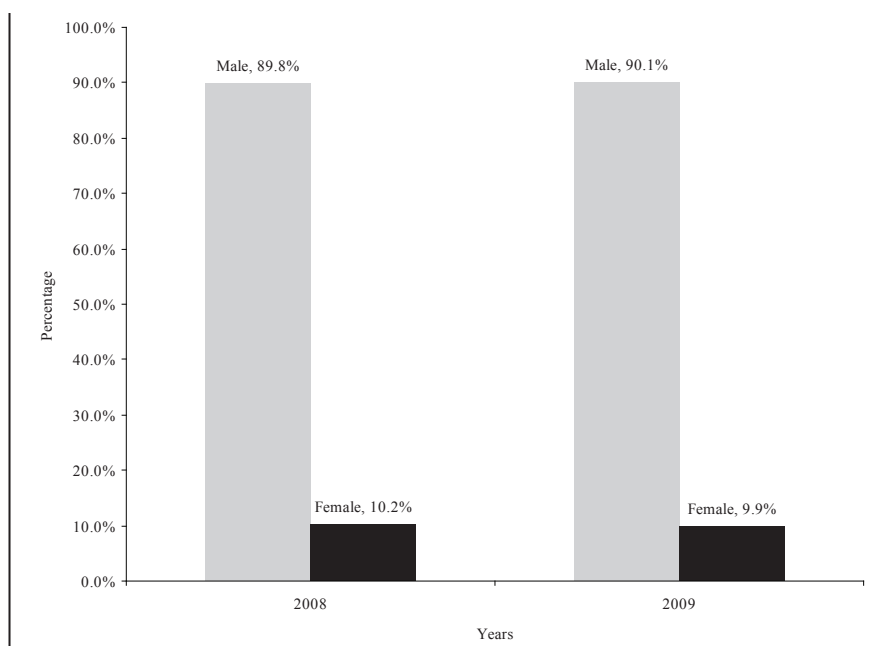

Distribution of MPs in parliament

This section discusses the distribution of MPs by demographic characteristics such as gender, positions held in parliament, and nominations.

1. Distribution by Gender

The 10th parliament registered the highest number of women ever with a total of 22 (9.8%) women MPs, this is an improvement from 18 (8.1%) in the 9th parliament. In 2008 after the death of Lorna Lebosu, another lady was elected in her place keeping the number of women at 22; this also made the number of women who participated in 2008 increase to 23. The number of MPs remained the same in 2009.

Gender	2008		2009	
	Number	Percent	Number	Percent
Male	202	89.8	201	90.1
Female	23	10.2	22	9.9
Total	225	100.0	223	100.0

2. Distribution by Nominations

The mode of nomination to the 10th parliament can be used as the benchmark for gender consideration both in parliament and other sectors in Kenya. Out of a total of 12 nominated MPs, 6 (50%) are female and the other half are males. At the party level, ODM nominated 3(50%) women and 3(50%) men out of the six positions they were allocated. PNU, ODM-Kenya and KANU divided their allocation of six positions among themselves, with PNU nominating 3(100%) men, thereby leaving out

women. ODM-Kenya was allocated two slots and shared them equally by nominating a woman and a man, which is also commendable. KANU was allocated one slot and nominated a woman. Generally speaking the two sides of the coalition achieve the one third minimum required of them. The nomination structure has remained the same to date.

3. Distribution by Political Party

The following table shows the distribution of MPs by the political parties they are affiliated to. The table shows that the four major parties in the 10th parliament are ODM with the largest number of MPs followed by PNU, ODM-K and KANU.

Political Party	2008		2009

CHAPTER

3 Analysis of House Business Proceedings

Introductions

House Business - are matters to be dealt with by the house at any one sitting. Matters that constitute the Business of the House comprise of Substantive Motions moved by Ministers and Backbench Members, for adoption; Sessional Papers for resolution on any matter; adoption of reports of committees; Questions to elicit replies; and several stages of Bills. All these activities are governed by Parliamentary Practice and Procedures. The processes by which Parliament transacts its proceedings; Members relation to each other, the totality of what Parliament applies in carrying out its role and functions, is called procedure. The procedure of Parliament is wide and includes the unwritten and written working processes that have come into place by way of practice, tradition, convention, etiquette, and rulings by Mr. Speaker. The written or codified form is normally referred to as the procedure and the unwritten form which includes all traditions, conventions, rulings of Mr. Speaker is normally referred to as the practice. Thus in totality is known as Parliamentary Practice and Procedure. The indicators discussed in the following sections are derived from the House Business as well as Parliamentary Practice and Procedure.

Analysis of Bills Brought to Parliament

Bills are draft legislations for consideration by the National Assembly. Once they are assented to by the President they are called Acts of Parliament.

ing by the end of the session. In 2009 six MPs brought a total of 11 Government Sponsored Bills, out of which eight were passed, two were still pending by the end of the third session and one was opposed.
