

## Survey on Jordanians' Perceptions on Foreign Relations

KAS is a German political foundation, closely associated with the Christian Democratic Union of Germany (CDU). Since 1982, Konrad-Adenauer-Stiftung has been present with its office in Jordan where it promotes democracy and the rule of law as it does throughout the region and worldwide. Moreover, KAS Jordan Office intends to provide a sustainable contribution to the development and deepening of social and market based structures. By offering political education, KAS supports the development of political parties, civil society, local self-administration and free and independent media.

In the Middle East, KAS is taking part in the political, economic and social stabilization of the region. The Jordan Office therefore intends to combat terrorism and causes of migration. In order to prevent violent conflicts, KAS aims at promoting the consolidation of cooperation within the region and with Europe as well as the constructive dialogue of cultures and religions.

The partners of KAS Jordan Office are mainly civil society institutions, ministries, parliaments, universities, think tanks, employers' associations, local media and political parties.

NAMA is a technology driven strategic intelligence solutions provider to key stakeholders in the public and private sectors. NAMA strives to advance political, social and economic development in the MENA region, and more specifically in Jordan by utilizing extensive experience in polling, research, security, feasibility studies, business consultancy/ investments, monitoring and evaluation, and sustainable socio-economic development.

In addition to its demonstrated success in research and development since its inception in early 2016, NAMA built a high-tech polling center dedicated to data gathering and knowledge creation for political, social and economic purposes in Jordan and beyond. Nowadays, NAMA is building state of the art Media Monitoring Center (NMMC). It will monitor TV, Radio, Newspapers, and social media platforms. This operation of open source intelligence gathering is unique in its linguistic capabilities covering Arabic and its variants, Urdu, Persian, Kurdish, Turkish, English, Hebrew and Swahili. The system is also capable of facial and voice recognition. The combination of polling and open source intelligence capabilities gives NAMA an advantage in research and due diligence methods.

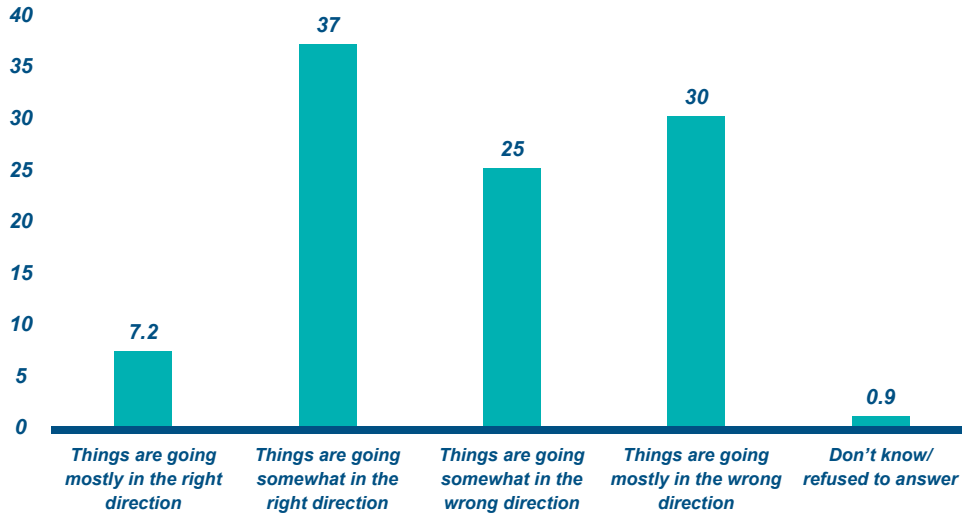

NAMA retains a highly experienced and agile team of researchers, consultants, experts, economists and analysts that enrich and drive our multi-disciplinary approach to transforming raw and big data into actionable intelligence that enable strategic decision making with our clients; who share our mission of enabling an environment that facilitates socio-economic development and policy making.

## Sampling and methodology

- The poll was conducted in August 2019.
- It covered a sample comprising of 1,198 Jordanians.
- The survey tool was designed cooperatively between KAS and NAMA.
- A primary draft was prepared and revised.
- Interviews were conducted through face-to-face interviews.
- The supervisor monitors the data collection and ensures the implementation of quality assurance measures.
- There are two functions specifically assigned to the data analysis team. They simultaneously handle the statistical analysis of the multiple choice questions in addition to the coding and analysis of the open ended answers through statistical analysis software such as SPSS & CPro.
