

# Program

## Macedonian modern centre-right policy and the climate and environmental related challenges

**23 February 2023**

**Skopje / Municipality of Butel**

*The European Green Deal, approved by the European Commission, is a set of policy initiatives planned to review existing legislation and its harmonization, and also introduce legislation on circular economy, buildings renovation, biodiversity, farming and to facilitate technological innovation.*

*In this regard there are some positive developments in Macedonian society to be recognized. The youth is keen on taking the science-based approach regarding the climate crisis. Centre-right political actors should collaborate with youth CSO's, and give an authoritative voice to academia and expert, and by doing so build a forum that could provide science and facts.*

---
