

OUR FOCUS GROUPS

In its efforts to strengthen freedom of the media, KAS collaborates with individuals and institutions that are involved in professional media work.

These include:

- journalists and media representatives
- publishers, management staff of media companies
- trade organisations and NGOs
- professionals in media law and media scientists
- communication experts

In addition, KAS supports politicians, political parties and their PR staff in professionalising their communication.

OUR EVENTS

In collaboration with national and regional partners, the Media Programme organises and supports educational events and dialogue programmes. Our consulting activities include national and international conferences, seminars, workshops, training sessions as well as the preparation of studies, analyses and other print and multimedia products.

The cross-country approach of the Media Programme is intended to deepen regional cooperation and to facilitate an exchange amongst the countries in the region. To this end, KAS provides support to regional networks and platforms for dialogue. In addition, KAS invites representatives on fact-finding trips to Germany and offers support to young talents in the region through educational programmes and fellowships.

THE MEDIA PROGRAMME

Freedom of the press and freedom of speech are fundamental values for a functioning democracy. Journalists play a crucial role in informing the public; they enable debates and discussions, guarantee transparency and can trigger change and democratic development.

In many parts of the world, freedom of the press and freedom of speech are endangered by censorship, corruption and threats to journalists who voice criticism. Pluralism of opinion is further jeopardised by increasing media consolidation and opaque ownership structures.

Promoting democracy ultimately means establishing free and independent media. For this purpose, the foundation has set up regionally operating Media Programmes in Johannesburg, Singapore and Sofia since 1993. Each programme's activities are aimed at supporting the development of freedom of the press and freedom of speech.

OUR OBJECTIVES

- Promote independent, high-quality and value-based reporting
- Help journalists to improve their professional skills
- Increase quality of reporting
- Improve general conditions for an independent and diverse media landscape
- Establish ethical standards amongst media
- Establish and develop journalist networks at the national and regional level
- Improve political communication of politicians and political parties
- Facilitate networking between media professionals and actors of political communication
