

IBM Smarter Cities

The City of tomorrow – The intelligent City

June 2014, Kay Hartkopf, Smarter Cities Leader DACH
IBM Germany

Agenda

1 IBM Smarter Cities

2 Infrastructure challenges

3 IBM Smarter Cities Solutions

Strategies of urban planning

„The Death and Life of Great American Cities“

Jane Jacobs (1961)

Humans live in communities
characterized by layered complexity
and seeming chaos

Most violent: urban renewal
and separation of uses

Richard Florida

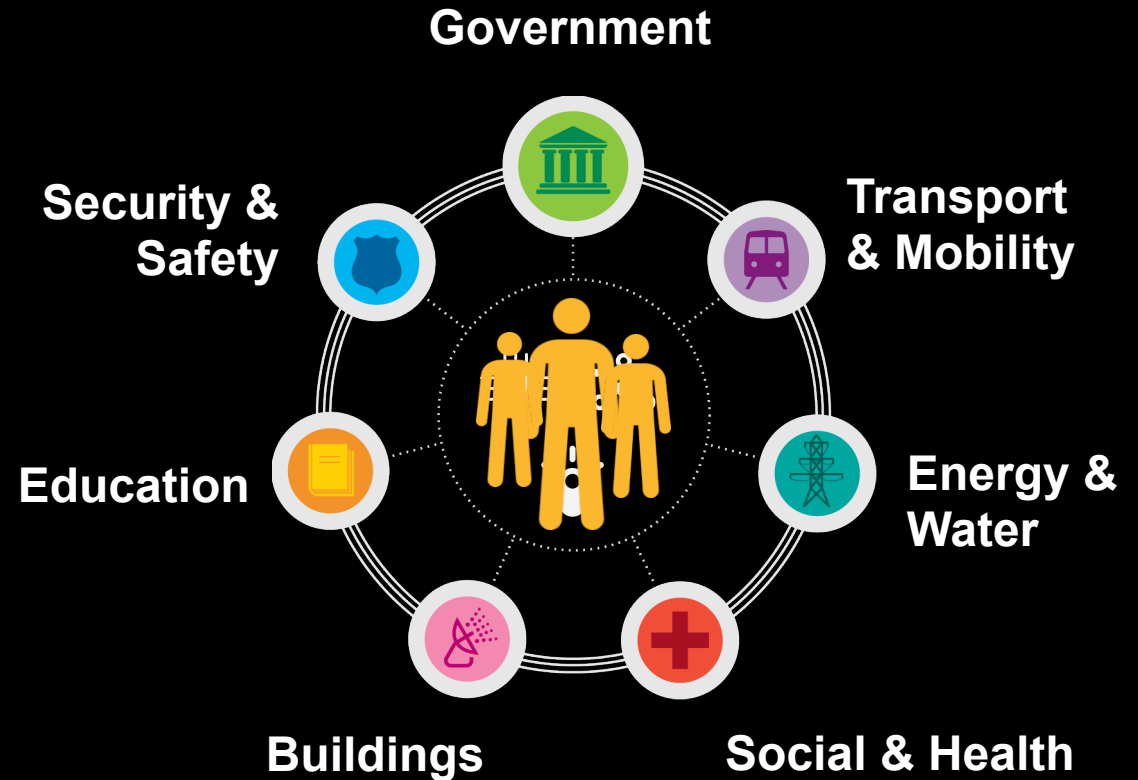

(American urban studies theorist)

A creative class (incl. technology workers, artists, musicians, diversity index) fosters an open, dynamic and professional urban environment

IBM Smarter Cities:

“Rethinking” cities from citizen experiences and expectations

From the citizen's perspective, all city domains interact

How IBM can help cities become smarter ?

Our world is more and more
INSTRUMENTED

Our world is more and more
INTERCONNECTED

Virtually, all systems can become
more and more
INTELLIGENT

Agenda

1 IBM Smarter Cities

2 Infrastructure challenges

3 IBM Smarter Cities Solutions

Aging infrastructures require city leaders actions

Transport

In France, traffic jams cost 1.5% GDP per year and 27% of CO2 emissions.

Safety

City assets need a better protection. But how to manage image volumes and valuable information?

Energy

An energy blackout, which originated in Germany, affected Paris and 15 French regions, its effects were felt in Austria, Belgium, Italy and Spain.

Situation of infrastructure

\$57 trillion global infrastructure needed in 2013-30

\$1 trillion annual savings from a 60% improvement in infrastructure productivity

Economic Infrastructure			Social Infrastructure	Service
Transport	Energy	Telecommunication		
Streets	Gas & power supply	Kabel network	Schools	Productivity increase
Bridges & tunnel	Water supply	Satellite system	Hospitals	Sustainability
Train & metro	Water distribution		Prisons	Smart approaches
Logistics center	Effluent disposal		Courts	
	Renewable energies			

Working harder is not sustainable

Cities require innovative approaches

Event List

Event	Type	Category	Severity
2011-11-05 04:52:50	Event	Update	Severe Traffic Accident involving multiple vehicles
2011-11-05 04:57:00	Event	Alert	Water quality has effected over 1000 h
2011-11-05 04:57:00	Event	Alert	Size of the crowd gathered has exceded
2011-11-07 17:51:42	Incident	Update	Storm Coverage
2011-10-28 20:18:33	Event	Alert	Water quality plant in North Water has
2011-10-28 20:19:21	Event	Alert	Congestion predicted on main road
2011-10-28 20:14:28	Event	Alert	
2011-10-28 20:14:21	Event	Alert	
2011-10-28 20:14:07	Event	Alert	

Incident Management

Automatic Triggered Operations

Activity	For	Launch	Role
Step 1: Prepare evacuation strategy	Severe Storm	Y	OPER
Step 2: Communications to first responders	Severe Storm	Y	OPER
Step 3: Ensure resources are ready	Severe Storm	Y	OPER
Step 1: Validate severity of readable	Madride	Y	OPER
Step 2: Send hazardous materials	Madride	Y	OPER
