

Public Grant Opportunity for Research and Publication on
Readiness in the Arctic - strategic factors influencing the Arctic strategy of Canada, EU and
its NATO partners. Recommendations for the future.

Konrad Adenauer Foundation Canada Office, Ottawa, July 2026

Purpose: Konrad Adenauer Foundation Canada Office seeks to enhance cooperation and dialogue between Germany, Canada and Europe through innovation, civil science, as well as in the areas of security, technology, climate change and migration. As #KAS4Security&Democracy being a priority for 2026, Konrad Adenauer Foundation Canada Office will fund security, technology and democracy related scientific research and publications to its strategic objectives as outlined in its [website](#).

Grants under #KAS4Security&Democracy are provided at the sole discretion of Konrad Adenauer Foundation. This document underlines the financial and administrative procedures for the management of the grant and sets the general terms and conditions governing grants made under #KAS4Security&Democracy.

Before an application is submitted, general questions about the #KAS4Security grant should be addressed to ursula.verrillo@kas.de.

Process:

1. What does #KAS4Security&Democracy Konrad Adenauer Foundation Canada Office Offer?

Konrad Adenauer Foundation Canada Office will fund several different research throughout 2026. The grant will support collaborative applied research and development projects which must:

- address one or more of the topics underlined in the document as priority
- demonstrate a clear link to economic security, strengthening democracy on defence and emerging disruptive technologies, such as AI audits impact in times of uncertainty
- demonstrate perspectives of the new global order of the middle powers
- establish a research collaboration between a minimum of one Canadian expert and one eligible EU member expert

And show evidence of:

- high quality research and development with clear resources,
- realistic objectives and results

-solid timelines, and deliverables,

-fair budget distribution to the research that is made and reflects the nature of the work and guarantees substantial involvement of researchers from both Canada and one EU member state

-collaboration between researchers, regular updates about the research and potential end-users of the results.

2. Budget Range

While the hard limits for the budget of different research can be discussed with KAS Canada office, a typical 6-month research project are in the 10,000-20,000CAD range. If your project requires more than 20,000CAD, please write an additional one-page abstract of your proposal justifying how the funds would be used with an estimated budget, to evaluate whether such a project fits in the overall portfolio of #KAS4Security&Democracy before a full application is developed.

3. Who can apply?

#KAS4Security&Democracy Public Grant is open to any researcher, public institution, think tank or institute who are based in Canada, and willing to work with Canadian and EU Member State researchers.

The principal applicants shall be called the “Research Director” and have their own budget allocated in the application. An application shall have no more than one Research Director per institution. The Research Director is responsible for the planning and progress of the work performed at their institution and works with the other appointed researchers or experts to ensure the success of the project.

Topics, Benefits:

1. Application and Evaluation

The topics for the grant are chosen and prioritized as:

2. Readiness in the Arctic - strategic factors influence the Arctic strategy of Canada and its NATO partners. Recommendations for the future in strategic partnership with Europe

3. Project Plan

The project plan should be outlined in a clear, transparent manner with timelines of the date of research, visits, the chosen researcher justification and resources.

All interested parties should submit their proposal by **30 August 2026** to ursula.verrillo@kas.de.

Contract Award and Finances:

1. Approval and Award

The approval and the selection of the proposed research project is at the discretion of the Director of Konrad Adenauer Canada Office and Konrad Adenauer Foundation Headquarters in general.

All chosen projects will be notified by the **middle of September 2026** and contacted for further planning. The chosen research projects will be announced in KAS Canada website. At the end of the November 2026, all chosen research projects will be published and showcased by Konrad Adenauer Foundation Canada Office.

2. Reporting

The chosen project's "Research Director" should report every month to Konrad Adenauer Foundation Canada Office management regarding the improvement, development and research of the project.

If there is a force majeure such as natural disaster, death and unexpected circumstances, the event shall be immediately reported to Konrad Adenauer Foundation Canada Office management.

3. Timeline assessment and payment

After the initial award of the contract and chosen research projects, there will be a 10% payment of advance payment to the respective institutions.

The rest of the funding will be allocated after the publication of the chosen and justified research.

4. Project close out / changes to the project plan

The expected project finish date and timeline is foreseen as **20 December 2026**. If there are immediate changes to the chosen and proposed project plan, please immediately report back to ursula.verrillo@kas.de.

If there is a force majeure such as natural disaster, death and unexpected circumstances, the event shall be immediately reported to Konrad Adenauer Foundation Canada Office management.

5. Communication, Outreach and Distribution

All the outreach, communication and distribution of the research project mainly will be covered by Konrad Adenauer Foundation Canada Office. The partner/collaborating institute should contact KAS Canada Management for further inquiries regarding communication purposes.

Example Questions to elaborate on:

- 1) Why has the Arctic become a strategic priority for Canada, NATO, and European allies?
- 2) What role do Canada's northern territories play in NATO's deterrence strategy?
- 3) Is the Canadian Armed Forces adequately prepared for Arctic operations?
- 4) What infrastructure gaps limit Canada's Arctic readiness?
- 5) What role will artificial intelligence play in Arctic defence?

Konrad Adenauer Foundation Canada Office will fund several different research throughout 2026. The grant will support collaborative applied research and development projects which must:

- address one or more of the topics underlined in the document as priority
- demonstrate a clear link to security, defence and emerging disruptive technologies
- establish a research collaboration between a minimum of one Canadian expert and one eligible EU member expert

And show evidence of:

- high quality research and development with clear resources,
- realistic objectives and results
- solid timelines, and deliverables,
- fair budget distribution to the research that is made and reflects the nature of the work and guarantees substantial involvement of researchers from both Canada and one EU member state

-collaboration between researchers, regular updates about the research and potential end-users of the results.

2. Budget Range

While the hard limits for the budget of different research can be discussed with KAS Canada office, a typical 6-month research project are in the 10,000-20,000CAD range. If your project requires more than 20,000CAD, please write an additional one-page abstract of your proposal justifying how the funds would be used with an estimated budget, to evaluate whether such a project fits in the overall portfolio of #KAS4Security&Democracy before a full application is developed.

3. Who can apply?

#KAS4Security&Democracy Public Grant is open to any researcher, public institution, think tank or institute who are based in Canada, and willing to work with Canadian and EU Member State researchers.

The principal applicants shall be called the “Research Director” and have their own budget allocated in the application. An application shall have no more than one Research Director per institution. The Research Director is responsible for the planning and progress of the work performed at their institution and works with the other appointed researchers or experts to ensure the success of the project.

Topics, Benefits:

1. Application and Evaluation

The topics for the grant are chosen and prioritized as:

“Agenda 2026: What challenges does Canadian politics face, and what role does Europe play in this context?”

2. Project Plan

The project plan should be outlined in a clear, transparent manner with timelines of the date of research, visits, the chosen researcher justification and resources.

All interested parties should submit their proposal by 10 July 2026 to info.canada@kas.de.

Contract Award and Finances:

1. Approval and Award

The approval and the selection of the proposed research project is at the discretion of the Director of Konrad Adenauer Canada Office and Konrad Adenauer Foundation Headquarters in general.

All chosen projects will be notified by the end of July 2026 and contacted for further planning. The chosen research projects will be announced in KAS Canada website. At the end of the November 2026, all chosen research projects will be published and showcased by Konrad Adenauer Foundation Canada Office.

2. Reporting

The chosen project's "Research Director" should report every month to Konrad Adenauer Foundation Canada Office management regarding the improvement, development and research of the project.

If there is a force majeure such as natural disaster, death and unexpected circumstances, the event shall be immediately reported to Konrad Adenauer Foundation Canada Office management.

3. Timeline assessment and payment

After the initial award of the contract and chosen research projects, there will be a 10% payment of advance payment to the respective institutions.

The rest of the funding will be allocated after the publication of the chosen and justified research.

4. Project close out / changes to the project plan

The expected project finish date and timeline is foreseen as 14 November 2026. If there are immediate changes to the chosen and proposed project plan, please immediately report back to info.canada@kas.de.

If there is a force majeure such as natural disaster, death and unexpected circumstances, the event shall be immediately reported to Konrad Adenauer Foundation Canada Office management.

5. Communication, Outreach and Distribution

All the outreach, communication and distribution of the research project mainly will be covered by Konrad Adenauer Foundation Canada Office. The partner/collaborating institute should contact KAS Canada Management for further inquiries regarding communication purposes.

Example Questions to elaborate on:

- 1) How are economic pressures shaping Canadian political priorities?
- 2) How is political polarization affecting democratic debate in Canada?
- 3) What challenges does Canada face in balancing economic growth with environmental sustainability?
- 4) How has the trade agreement between Canada and the European Union influenced Canadian politics and business?
- 5) How important is NATO cooperation for Canada's security strategy?
- 6) What political challenges arise from balancing climate goals with resource-based industries?
