

Historical Walking Tour

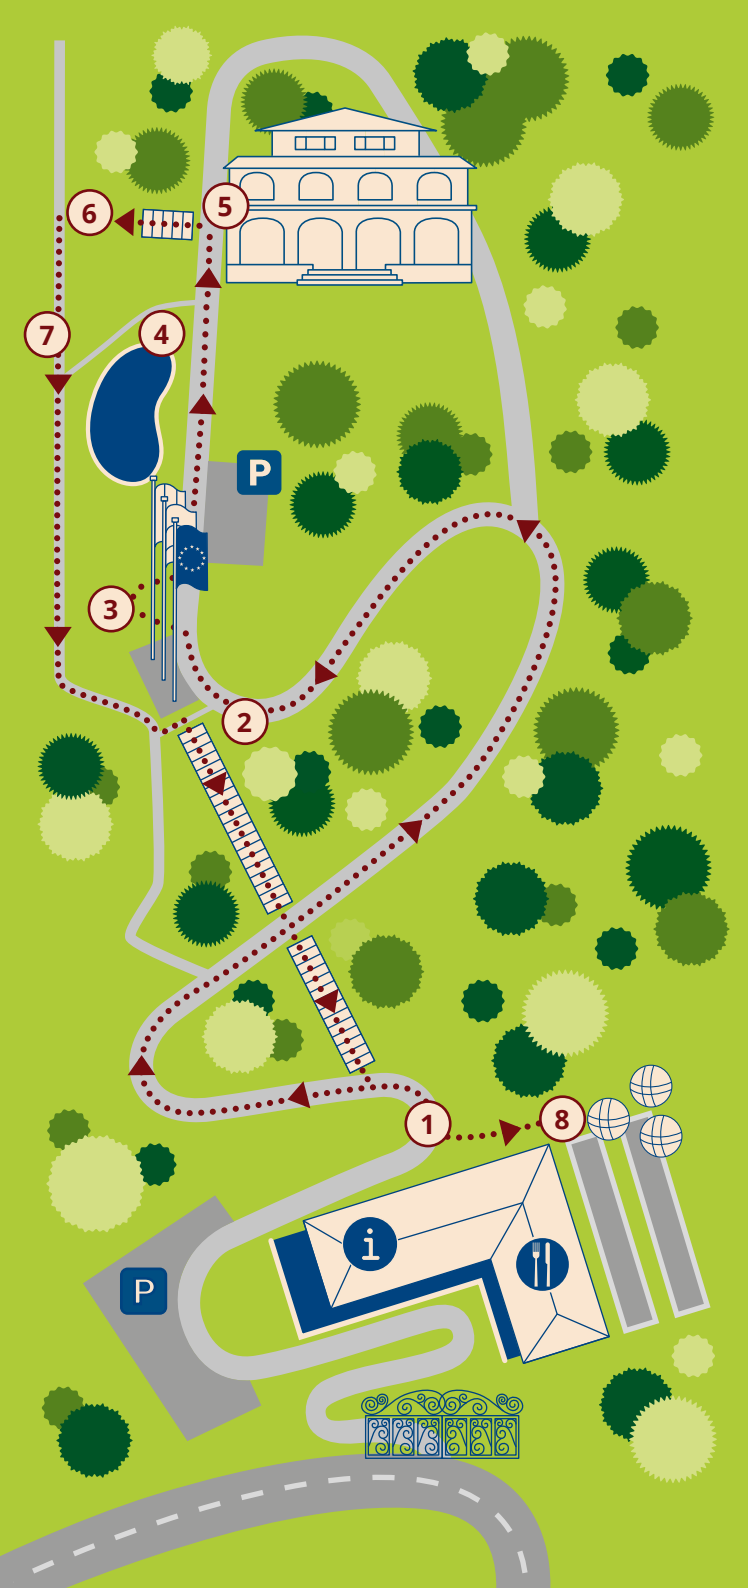

What can you expect?

Konrad Adenauer (1876-1967), first Chancellor of the Federal Republic of Germany from 1949 to 1963 and driving force behind the policy of Western integration, the European integration process and the “social market economy”, regularly spent his vacations in Cadenabbia between 1957 and 1966, from 1959 in “Villa La Collina”.

Follow in the footsteps of one of the most important statesmen of the 20th century from an unusual perspective! There are steles with QR codes at various locations on the property. With the help of your smartphone, you can find out more about Adenauer's leisure activities, how the chancellor carried out his official duties while on “vacation”, his relationship with nature and his encounters with both locals and prominent guests. Historical photographs of the original locations give a vivid impression of his stays at “Villa La Collina” on Lake Como.
